

Lista Combination Cabinets

Versatile cabinet housings allow storage of wide range of contents

Lista's new combination cabinet is the next advancement in storing, securing and moving items of varied size and shape.

These cabinets feature full-width top drawer(s), which can store unusually long items safely and securely. The cabinets can be configured with a variety of drawer sizes (including a choice of either full or shallow depth), and the option of shelf or roll-out tray storage for bulky items.

Optional tops, including stainless steel cover, plastic laminate and butcher block, allow the top of the housing to serve as a functional worksurface.

For security, choose from removable core locks, keyed-alike and master lock groupings, our new keyless keypad lock, hinged lock bars, and more. A central locking system

locks all drawers in the cabinet with one key. The PrevenTip® locking system allows only one drawer on each side to be opened at a time to prevent tipping. Mobile units feature individual drawer latches on all drawers and roll-out trays for safety when moving.

A host of base options are available, including two styles of mobile base, our new wet clean base, fork truck, pallet truck and frame bases.

All drawers and roll-out trays are full extension. When closed, the full-width drawer handles are flush with the face of the housing, so nothing protrudes (preventing clothing from snagging).

HT900-C750/STST

Part numbers are for housings only. Units include individual locking system with PrevenTip® locking system. **Drawers, shelves, roll-out trays, doors, base and top must be configured separately, and are not included.**

DW900-C750/SCSC

DW/SC Combination Cabinet Housing

56 1/2" wide x 28 1/2" deep – DW top drawer(s) usable width 52 3/16", SC bottom drawers usable width 24"

includes (4) 1 5/8" diameter adjustable stainless steel feet

PART NO.	FOR USE WITH CABINET HOUSING
WCB-DW	DW
WCB-HT	HT
WCB-MW	MW

Wet Clean Base

- Allows for easy cleaning below housing.
- Ideal for areas where floors are often washed (such as labs and hospitals), or where wet floors are an issue.
- Raises cabinet housing 4 9/16" above floor. Individual leg height is further adjustable to allow for leveling (up to 1 3/4" additional height), even on extremely uneven surfaces.
- Cabinet can be lifted and moved with pallet jack.
- 8000 lb. overall weight capacity.
