

LISTA GENERAL WORKBENCH AND WORKSPACE FURNITURE CATALOG

LISTA
making workspace work®

Lista offers a comprehensive array of innovative workspace and accessory systems, all of which are described in this catalog. Within the following pages, you'll find:

- Easy-Order offerings of a broad range of Lista products
- A wide selection of accessories that allow you to create your own custom solutions
- Solutions for almost any workspace need, and much more!

You can use this catalog to order the workspace systems that exactly suit your individual needs.

To help you navigate the catalog, our sections are color coded:

Arlink® 8000 Workstations

Align® Adjustable Height Workstations

Technical Electronic Workstations

Industrial Workbenches

Cabinet Pedestals

Nexus System, including Packing Benches, Stands and Trolleys

For in-depth index, see page 99.

Lista – Making Workspace Work® 4

Workstations and Ergonomics 6

Workspace Furniture 8

Arlink® 8000 Workstations 12

Arlink 8000 Easy-Order Combinations 18

Build-Your-Own Arlink 8000 Workstations 20

Arlink 8000 Components 22

Arlink 8000 Flow Racks and Utility and Parts Carts 29

VSI (Vertical Space Integrator) Accessory System 31

For a complete list of contents for Arlink 8000 workstations, see page 13.

Align® Adjustable Height Workstations 32

Align Adjustable Height Workstation Easy-Order Combinations 34

Align Adjustable Height Workstation Components 35

For a complete list of contents for Align workstations, see page 9.

Technical Electronic Workstations 38

Technical Electronic Workstation Easy-Order Combinations 40

Technical Electronic Workstation Components 42

For a complete list of contents for technical electronic workstations, see page 9.

Industrial Workbenches 46

Industrial Workbench Easy-Order Combinations 52

Industrial Workbench Components 56

For a complete list of contents for industrial workbenches, see page 47.

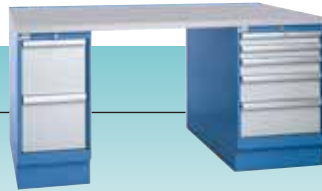

Cabinet Pedestals 60

Narrow Width Cabinet Pedestals 60

Narrow Width Easy-Order Cabinet Combinations 62

At Lista, we provide the most complete selection of workbenches, workspace furniture, accessories and more. We help you create work environments that:

- Are high quality
- Improve productivity
- Benefit the user through smart ergonomic design
- Offer unmatched flexibility
- Are attractive and comfortable

The workbench you want, the way you want it.

No other workbench or workspace furniture supplier offers you such a comprehensive collection of solutions. And we're always exploring and developing new ways to make your workspace work even better. That's why you can count on us to provide:

- The flexibility to interchange accessories across our product line, for a custom solution without a custom price
- The freedom to reconfigure components and accessories to exactly suit the needs of different applications and users, no matter how often they change

We can provide workspace solutions that will fit the needs of every department in a wide range of facilities, including:

- R&D
- Manufacturing
- Assembly
- Quality control
- Maintenance & repair
- Shipping/receiving
- Laboratories
- Warehouse/distribution
- Service & repair
- Test & calibration
- Education
- And more

Built to last.

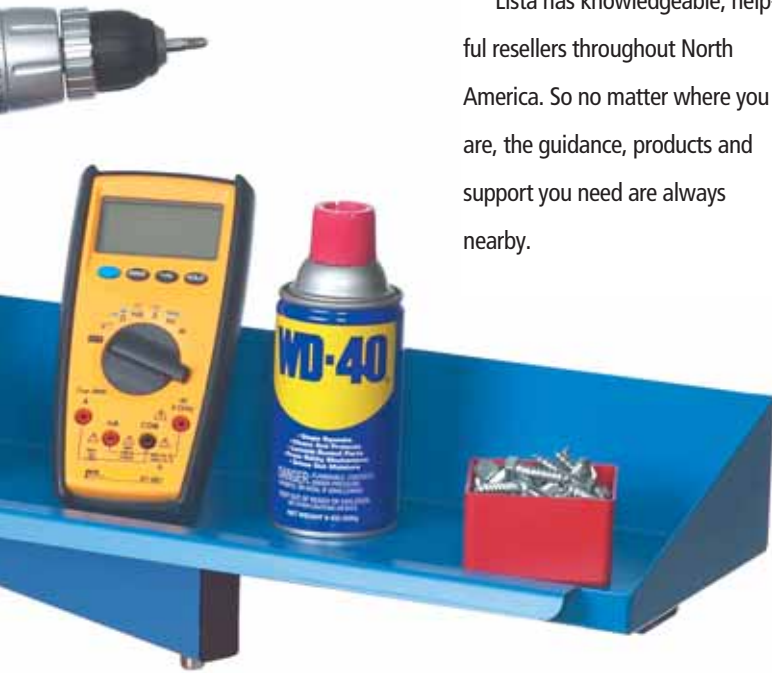

The result of high-quality, all-steel construction and innovative engineering and design, Lista products are built to provide decades of functionality and ease of use in the most demanding working environments. Each solution we offer features superior stability and durability, the hallmarks of all Lista products.

Our products feature a durable, high-quality powder coat finish.

An investment in a Lista modular workspace system will still be paying dividends years from now.

**The industry's best products
deserve the best support.**

Lista has knowledgeable, helpful resellers throughout North America. So no matter where you are, the guidance, products and support you need are always nearby.

**Our free design services are
actually priceless.**

Lista's engineering and design team is ready to provide you with a detailed plan for your individual workspace and storage needs, free of charge. We offer solutions that are designed for maximum efficiency and future flexibility, optimizing space and profitability.

- **Floorspace utilization analysis:** we can prepare CAD drawings of site plans and elevations for a grouping of products, or entire room-sized solutions.
- **Customized surveys and layouts:** Lista experts will survey your current and future storage and workspace needs, and propose solutions that provide the highest density and greatest productivity.
- **Integration with architectural and construction planning:** rely on our experience with coordinating with architectural and construction professionals at any stage of a project's development.
- **Price quotes:** we are happy to provide free estimates and price quotes for any project, regardless of size.

**Custom applications that think
outside the box.**

Custom applications are never a problem at Lista. Our engineering and manufacturing teams will work closely with you to analyze your needs and modify our standard products to meet your special requirements.

Lista – Putting Ergonomics in Their Place

No matter what kind of job is performed at a Lista workstation, your workers benefit from the most advanced application of ergonomic science. They'll be safer, more comfortable, more organized, and ultimately, more productive.

Why are ergonomics important?

Twisting, lifting, bending, reaching – these movements can waste time and put unnecessary stress on your workers. Repetitive motion injuries and other work-related musculoskeletal conditions increase both downtime and workers' compensation costs. The application of ergonomic principles can:

- Improve productivity by eliminating wasted motion
- Minimize the risk of work injuries
- Reduce workers' compensation cases

Get in the zone.

Work is most efficient when it's kept within areas defined as "primary reach zones" – the horizontal and vertical areas a worker can reach with minimal arm, head or trunk movement (see illustrations below). Work outside the primary reach zones adds movement, wastes time and erodes productivity.

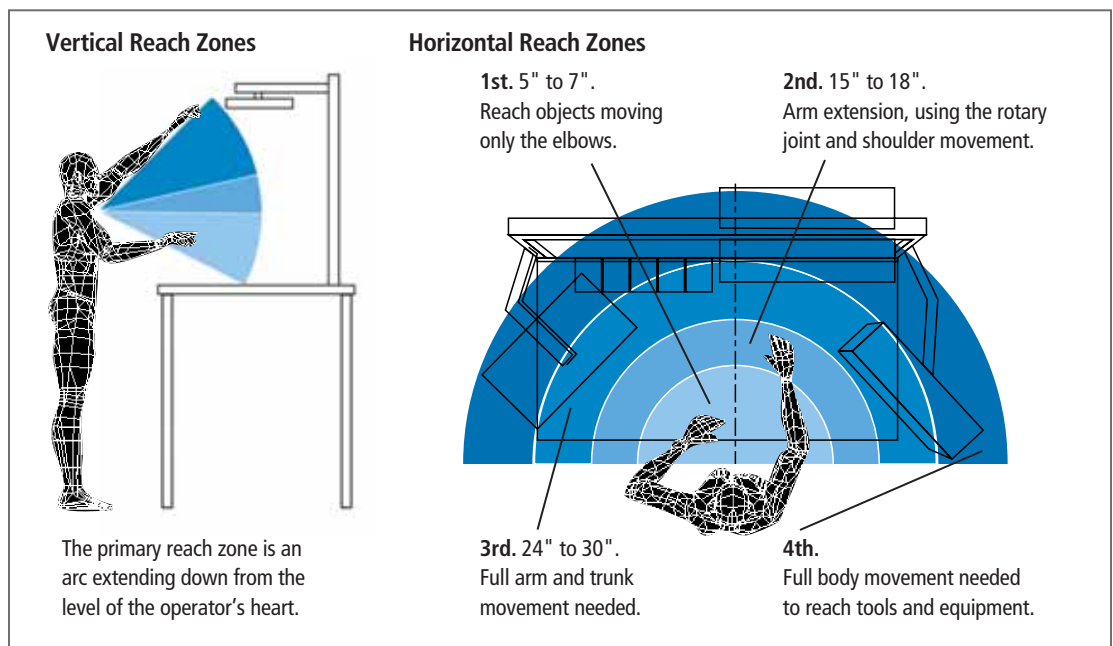

By addressing the differences among tasks and workers, we can develop ergonomic workspaces that fit just about any situation. In this catalog, you'll find:

- Height-adjustable worksurfaces that can be raised or lowered

- Articulating arms that position components and tools within easy reach
- Other above-the-worksurface accessories that minimize worker strain

Our solutions keep workflow compact, organized and as close as possible to the primary reach zones, for less stress on your workers and more efficiency and productivity for your business.

How do we make workspace work so well?

To create your optimal Lista workspace, we ask a lot of questions:

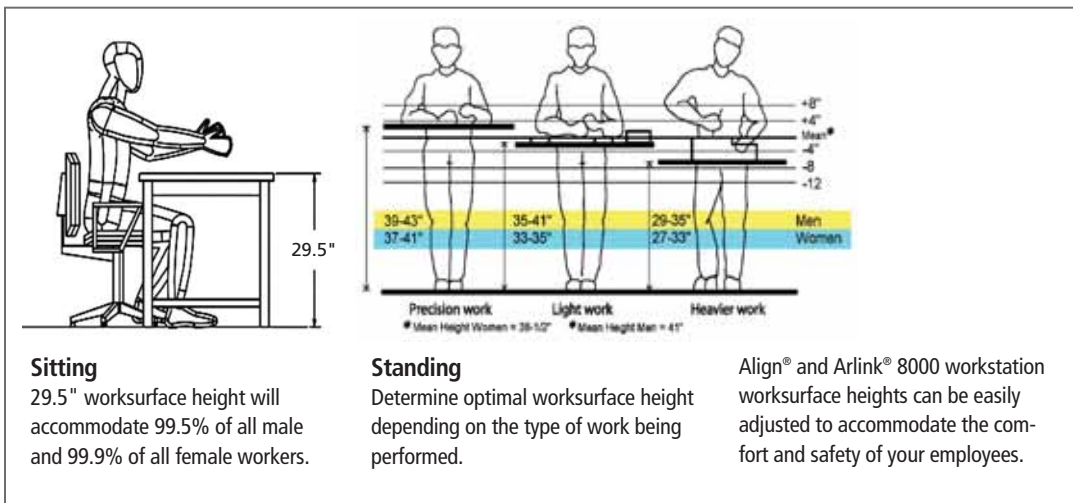

- Does the work process involve handling heavy, bulky or awkward items?
- Is there a high product mix, with many product changeovers every day?

- Will workstations be integrated with material flow (racks or conveyors, for example)?
- Is there frequent job rotation? Do workers from different shifts or departments share a station?
- Will employees work alone, back-to-back or in teams?
- Does the workstation require power tools, computer equipment, supplemental lighting or storage space?

Based on your answers, our workspace designers and engineers develop comprehensive technical and design plans that illustrate the workspace solutions and accessories that will help your operation become as safe and productive as possible.

The economics of ergonomics.

Immediate increases in productivity mean greater profitability and a quick return on your investment. Long-term cost efficiency is delivered through reconfigurable components that keep pace with changes in your work processes. The safer work environment provided through ergonomic design helps minimize the risk of work-related injuries, so you also minimize workers' compensation claims and lost days. Add it all together, and the value of an ergonomically designed Lista workspace solution is clear.

Sitting
29.5" worksurface height will accommodate 99.5% of all male and 99.9% of all female workers.

Standing
Determine optimal worksurface height depending on the type of work being performed.

Align® and Arlink® 8000 workstation worksurface heights can be easily adjusted to accommodate the comfort and safety of your employees.
