Lista Unique Workspace Solutions

Overhead cabinets featuring sliding doors with steel-framed plexiglas windows enable lab personnel at DCE Aprilis, Inc. to access delicate lab instruments and glassware. The row of cabinets below is topped by a phenolic resin counter top.

Lista Unique Workspace Solutions

Ideal companions to Lista's modular drawer storage cabinets, overhead cabinets bring organization to the storage of binders, bulk storage or any items that require constant access, ample room and safe storage.

Overhead cabinets with steel-framed plexiglas doors hold an array of books, manuals and binders in a classroom at the Four Rivers Career Center.

Overhead cabinets bring organized, efficient storage of instruction manuals, binders and other reference books to this airline's repair shop.

An overhead cabinet with retractable door provides convenient bulk storage above a drawer cabinet in the machining area of an aircraft repair facility.

Open shelf overhead cabinets store jars of additives in the food testing labs at T. Marzetti, a manufacturer of salad dressings.

16" High Overhead Cabinets

Cabinets come with bottom shelf, and are 15" deep with a usable shelf depth of 13 $1/2$". Useable height for cabinet without door is 14", and with retractable door is 13".

How to order an overhead cabinet

1. **Select overhead cabinet** based on your choice of dimensions. To order an overhead cabinet without doors, use the base part number as it appears in the charts to the left.

2. ■ **Select optional door type.**

   for 16" high overhead cabinets
   RD = retractable door

   for 29" high overhead cabinets
   HD = hinged doors
   HDP* = hinged doors with steel-framed plexiglas
   SD* = sliding doors
   SDP* = sliding doors with steel-framed plexiglas

   * plexiglas doors available for cabinets 28" and wider only

   ** sliding doors available for cabinets 40" and wider only

3. ■ **Select lock type.**

   RG = individual
   KA = keyed-alike
   MA = master

   All cabinets lock at bottom.

4. □ **Select paint color.** For color chart, see back cover.

EXAMPLE: to order an OHC2316 overhead cabinet with a retractable door, an individual lock and Bright Blue paint, the part number would be **OHC2316-RDRGBB.**

Overhead cabinets are 15" deep and are available in two heights (16" and 29") and a variety of widths to suit individual storage needs.

Overhead cabinets feature shelves adjustable at 1 $1/2$" increments. All cabinets with doors offer locks to protect stored materials.

Retractable doors are available for 16" high cabinets. Sliding or hinged metal doors (both with and without a plexiglas window) are available for 29" high cabinets.

Lista overhead cabinets can be mounted to a wall for stability and permanence. Mount either directly to the wall with customer-supplied hardware, or by using a Wall Mounting Kit.

Overhead cabinets can also be easily mounted atop a stationary riser shelf for convenient support without having to mount the unit to the wall. Stationary riser shelves are available either with or without a back panel, and can be situated above any counter top.

Wall Mounting Kits

Brackets for mounting overhead cabinets to wall. Starter kit is required for first cabinet in row. One adder kit is required for each additional cabinet used. Starter kit includes brackets and end filler strips; adder kit includes brackets only. Color to match housing.

Lista counter tops provide a durable and attractive worksurface for rows of cabinets.

Counter tops are flush to the cabinets side-to-side and front-to-back. Tops are supplied with lag bolts and can be ordered for individual cabinets or as a continuous top for cabinet rows. See chart to the left for length limitations for cabinet rows.

To order a counter top for a row of cabinets with a variety of different widths, add the total width of all cabinet housings in the row (see chart to left). To order, please contact your Lista representative.

For cabinet tops for single cabinets, see page 67.

Computer Cabinets

Lista's versatile, feature-packed computer cabinet is designed to provide maximum protection from metal shards, dust and other workplace debris. The computer cabinet is ideal for PC's, terminals, and computer peripherals on the shop floor and in a variety of industrial and repair environments.

Aircraft mechanics in Northwest Airlines' Avionics Maintenance Department access computers above a plane being repaired at one of its Minneapolis hangars.

A mobile computer cabinet is paired with a mobile industrial workbench in Toyota Racing Development's machine shop.

A technician accesses a Lista computer cabinet which houses a diagnostic computer. The computer cabinet's mobility allows it to be relocated within the department as needed.

Lista's computer cabinet is packed with powerful features.

- Air intake fan with guard and fine filter (replaceable from the outside) – creates positive pressure, eliminates dust and possible damage to electrical components
- Large keyboard tray with hinged front gate allows space for mouse
- Monitor door has clear plexiglas window for visibility and protection
- Retractable door option for convenient access to touch screen monitors
- Monitor and lower door locks are keyed alike

- Lower sections provide secure storage for CPU and printer – printer tray extends for ease of access
- Surge suppressor protects equipment and hardware using advanced circuitry, eliminates dangers caused by surges, spikes and EMI/RFI noise
- 6 ½" wide rear access panel for ease of connection and routing of cables
- Several base options available
- Optional fan for lower section of cabinet
- Optional exterior folding shelf for additional storage

Opening for most 20" monitors

111

The secure, durable and flexible Lista Control Station is ideal for meeting the needs of a wide array of manufacturing floor applications:

- Quality station or foreman's workstation on the manufacturing floor
- Gauging station on an automotive assembly line
- Line supervisor's station in an assembly plant
- Shipping dock

This unique combination of a workbench, bookshelf and cabinet offers a private, protected, lockable workspace with organized storage and ready access to manuals and tools. The work area features a pegboard and one or two bookshelves. The Control Station is available in two heights – 91 ½" or 99 ⅜" tall.

The Control Station is available in all Lista paint colors (see back cover); the tambour door is available in dove gray only.

The Control Station features a slide-down tambour door that can be locked at the desktop or at the base of the station.

Bookshelf

Bookshelf

Pegboard

Holes in pegboard for power access (hidden)

Standard width 750 height drawer unit (optional)

Tambour door

Fluorescent light

Seat (optional – see our General Workbench and Workspace Furniture catalog)

MODEL CS2200/5

The Control Station's work area offers protection from dust and dirt for your expensive computer equipment, instruments and gauges. The Station's pegboard and bookshelves let you keep manuals and tools close at hand. The worksurface height at the butcher block top is 35 1/4".

The Control Station's storage cabinets can be outfitted with modular drawers in a variety of sizes. Drawers can be configured for compartmentalized storage of tools and parts, or to hold hanging files.

Easy-Order Control Station Combinations

The Control Station is available in 3 Easy-Order configurations. These 3 models are designed to accommodate the broadest range of Control Station sizes and features.

Basic Control Station
60 1/4" wide x 29 3/4" deep

Equipped as shown with lockable tambour door, bookshelf, pegboard, fluorescent light and 1 3/4" thick butcher block counter top. A variety of optional stationary and mobile cabinets can be placed under the counter top; see the cabinet section of this catalog to select the cabinet size that best fits your needs.

| PART NO.	HEIGHT	NO. OF BKSHV.	PEGBOARD HEIGHT

Lista Storage Wall® Systems (see pages 72-85) and stacked cabinets serve as ideal mezzanine supports. Our technical support and design team can help you determine the option that best suits your space and needs.

Stacked cabinets

With their all-steel construction, Lista cabinets can be stacked to help you maximize your floor space. You can rapidly re-arrange storage layouts to suit your changing needs.

To add a second level of storage space without adding an additional floor to their maintenance area, Gulf States Paper Corp. utilizes a mezzanine system. The system is home to 49 sets of stacked cabinets.

When Osram Sylvania needed to relocate a 3,300 square foot stockroom into a 1,500 square foot space, a mezzanine was the answer. The company combined new Lista cabinet housings and drawers with existing Lista cabinets to create this space- and money-saving solution.

Storage Walls Systems and stacked cabinets lend themselves to a variety of mezzanine configurations that take advantage of all available height. Examples pictured here are (clockwise from top) installations at a utility maintenance department, an aircraft repair facility and an automotive manufacturing plant.
